

# JASON J. BAGUNU JR.

## Experience

### DOST Regional Scholars Leadership Camp

June 2025 - Cauayan City, Isabela

I am one of the representatives of the University of Saint Louis Tuguegarao who attended the SLC. As a student, I learned the importance of servant leadership, where leading means putting others first and being a role model through action. I gained valuable insights on how to communicate effectively, collaborate with others, and stay committed to making a positive impact in both the school and the community.

### Service Learning Program

March 2025 - Penablanca, Cagayan

I participated in organizing and was one of the speakers in a service learning program where we taught students the basics of database management using MySQL and PHP. Being part of this learning program allowed me to share my knowledge while also improving my communication and teaching skills. It was a meaningful experience that strengthened my confidence, deepened my understanding of the topics, and reminded me of the importance of using what we learn to help others grow.

### Organizational Officer

August 2023 - Present - Tuguegarao City, Cagayan

I served as an organizational officer ever since my first year of college. I have learned the value of responsibility, teamwork, and time management while balancing academics and leadership duties.
